Art Unit: 1648

DETAILED ACTION

1. This restriction requirement is in response to the amendment of July 25, 2008, in which the Applicant amended the pending claims and added new claims requiring amendment of the previous, and the addition of further, species elections.

In the amendment, Applicant cancelled claims 173 and 179-181, and added new claims 188-197.

2. Claims 170-172, 174-178, and 188-197 are pending and subject to this restriction requirement.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 170-172, 174-178, and 188-197, drawn to methods for producing an immune response through the administration of a composition comprising a fusion of a hepadnavirus core protein and a heterologous sequence.

Group II, claim(s) 170-172, 174-178, and 188-197, drawn to methods for producing an immune response through the administration of a composition comprising an expression vector encoding a fusion of a hepadnavirus core protein and a heterologous sequence.

4. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature of these inventions is the use of a hepadnaviral core protein fused to a heterologous sequence. Such a construct is taught by Birkett (US 2003/00554337- of record in the October 2007 IDS). See e.g., pages 3, 9, and 10. In particular, it is noted that the reference indicates that non-human HBV core particles may be used on pages 3-4. The inventions therefore lack unity.

Species Election

5. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

For each of Groups I-II, Applicant is additionally required to elect embodiments wherein the hepadnaviral core antigen sequence is from

- (a) a rodent hepadnavirus (claims 170-172, 174, 188, 190-193, and 196),
- (b) an avihepadnavirus (claims 170-172, and 175, 188, 194, and 196),
- (c) a non-human primate hepadnavirus (claims 176-178, 181, 189, 195, and 197).

If Applicant elects (a) above, Applicant is further required to elect one of the specific rodent viruses of claim 190 (also found individually in claims 191-193).

If Applicant elects (b) above, Applicant is further required to elect one of the specific avihepadnaviruses of claim 194.

If Applicant elects (c) above, Applicant is further required to elect one of the specific nonhuman primate viruses of claim 195.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

- 6. The claims are deemed to correspond to the species as listed above. The following claim(s) are generic: claim 170 is generic to species (a) and (b). Claim 176 is generic to species (c) and (d).
- 7. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species lack unity for the same reasons as indicated with respect to Groups I-III above.

Conclusion

8. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Application/Control Number: 10/566,322 Page 5

Art Unit: 1648

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ZACHARIAH LUCAS whose telephone number is (571)272-0905. The examiner can normally be reached on Monday-Friday, 8 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bruce Campell can be reached on 571-272-0974. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
